

INTERNATIONAL IMMUNOLOGY SEMINARS JENA

Topic 2023: Translational Immunology

Martin Prlic

Vaccine and Infectious Disease Division
Fred Hutchinson Cancer Research Center
Seattle, WA, USA

T cell responses in healthy and inflamed human tissues

Wednesday, February 8, 2023, 4:00 pm (CET)

Online:

Zoom Meeting Room: <https://uni-jena-de.zoom.us/j/66429496329>

Meeting-ID: 664 2949 6329

Passcode: 726839

Organizer:

Christina Zielinski

Infection Immunology, Leibniz-HKI and Friedrich Schiller University Jena

Contact:

TRANSLATIONAL IMMUNOLOGY SEMINARS JENA

Martin Prlic

Vaccine and Infectious Disease Division
Fred Hutchinson Cancer Research Center
Seattle, WA, USA

Martin Prlic received his Ph.D in 2004 after training with Dr. Stephen Jameson at the University of Minnesota. He completed his post-doctoral training with Dr. Michael Bevan at the University of Washington in 2010 and was appointed Assistant Professor at the Fred Hutchinson Cancer Research Center (“Fred Hutch”) in 2011. Dr. Prlic is currently an Associate Professor at the Fred Hutch and an Affiliate Associate Professor in the Department of Immunology and the Department of Global Health at the University of Washington.

The connecting theme throughout his research career has been his interest in T cell fate decisions. The Prlic lab is particularly interested in studying T cell responses in human mucosal tissues and applies different single-cell analysis strategies including single-cell RNAseq, high parameter flow cytometry and AbSeq (linking protein biomarker expression and transcriptome data) to accomplish this. As an overarching lab goal and strategy, the Prlic lab strives to define the cues that guide activation, differentiation and maintenance of T cell and other immune cell populations to learn how these cues could be manipulated for therapeutic purposes.

Dr. Prlic is the recipient of the NIH Pathway to Independence Award and the NIH Director’s New Innovator Award (DP2).
