

The research campus Infectognostics is exploring new avenues in the diagnosis of infectious diseases and pathogens. The public-private partnership is financed by the Federal Ministry of Education and Research and the state of Thuringia and aims to develop tailored solutions for on-site diagnosis.

At the research campus in Jena, scientists from various institutions come together to collaborate and exchange ideas. It provides the basis for the creation of concepts that can grow into products developed by the involved companies. In addition to scientific projects educational measures are central components of the research strategy.
