News from the HKI

Scientists at the HKI use several ways of reporting their research results – these include scientific publications, lectures, conferences and colloquiums as well as many other events.

The map to the natural product treasure trove

Leibniz-HKI scientists develop a model of the evolution of biosynthetic pathways

More
Animal experiments at HKI

At the HKI, we conduct animal experiments in order to study infection mechanisms and to find new antiinfective compounds.

More
An introduction to HKI

Our researchers and employees explain their research in a short video.
