Scientific Excellence at the Leibniz-HKI

Miriam Rosenbaum receives an ERC Consolidator Grant

10.12.2019 // 09:13

With the ERC Consolidator Grant, the European Research Council specifically supports excellent scientific projects in Europe. Miriam Rosenbaum is a pioneer in the young field electrobiotechnology. The head of the Bio Pilot Plant at the Leibniz Institute for Natural Product Research and Infection Biology (Leibniz-HKI) and professor at the Friedrich Schiller University Jena will use the funding to establish a new working group. e-MICROBe, as the project is called, will research microbial bioelectrochemistry and establish the new field of research at the Leibniz-HKI.
