

Insights into research

The HKI supports pupils with their seminar papers and offers internships. Talking to experienced scientists, interested participants can get an insight into their research areas, put forward own hypotheses and check them by means of assisted experiments in the laboratory.

Upon interest, please hand in your proposal and contact the appropriate group within the HKI directly.

Subject to the agreement with the Thüringer Institut für Lehrerfortbildung, Lehrplanentwicklung und Medien (Thillm), within the frame of the scholarship programme „Stiftung Bildung für Thüringen“ and as a member of the Jenaer Kooperationsverbund witelo – scientific-technical places of learning in Jena – events for pupils and advanced training for teachers are provided.

Upon interest please contact:

Dr. Christine Vogler
