

Expedition into the world of micro-organisms

Together with the other research institutes at the Beutenberg Campus, the HKI makes its commitment on the Pupils' Research Day which derived from the Girls' Day and Boys' Day. Pupils from the 8th to the 12th grade are invited to look behind the scenes of research and to grab pipette and test tube and do experiments for themselves. Under the mentorship of HKI scientists, the pupils are to get to know future job profiles and gain experience in natural sciences.

The next Pupils' Research Day will take place in March 2021. Please see the website www.beutenberg.de for registration.
